

Antibody Test

Antibody testing is a valuable tool in the fight against COVID-19. By providing individuals with accurate insight into their exposure history, antibody testing helps people gain peace of mind and take control of their health—whether they developed only mild symptoms or no symptoms at all.

With a simple home-based finger-prick test, the MyLabs Antibody Test can determine the presence of COVID-19 antibodies **in under 10 minutes and with 99% accuracy.**

The MyLabs Process

Providing peace of mind with fast, accurate results.

With just one drop of blood, the MyLabs Antibody Test can detect COVID-19 antibodies within 10 minutes.

- Time: **10 Minutes**
- Specimen: **Blood**
- Measurand: **Antibody**
- Advantage: **Made in America**
